

ZYMAFLORE® VL2

Yeast particularly adapted to vinification in barrels, for white wines which are round on the palate, and which demonstrate varietal specificity.

*Qualified for the elaboration of products for direct human consumption in the field of the regulated use in Oenology.
In accordance with the International Oenological Codex.*

SPECIFICATIONS AND OENOLOGICAL PROPERTIES

ZYMAFLORE® VL2 is a strain for the production of complex white wines, which are **round** on the palate (polysaccharide production), while enhancing grape varietal and « terroir » (Chardonnay, Sémillon, Viognier) characters. Pof(-) strain, phenol off flavour, allowing wines with a delicate clean profile to be obtained. Perfectly suitable for **barrel** vinification and for producing **varietal, elegant** white wines (Super Premium, Ultra Premium).

This strain originates from a "terroir" selection in the Burgundian vineyards.

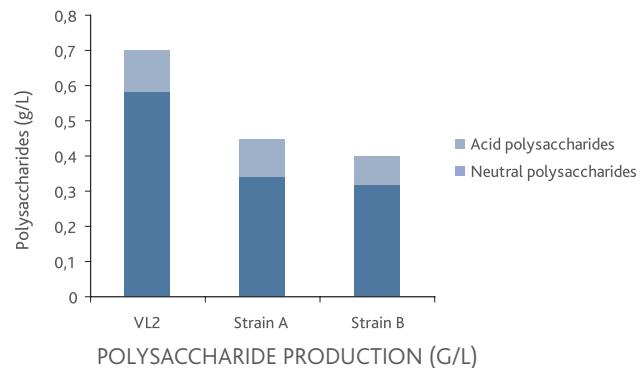

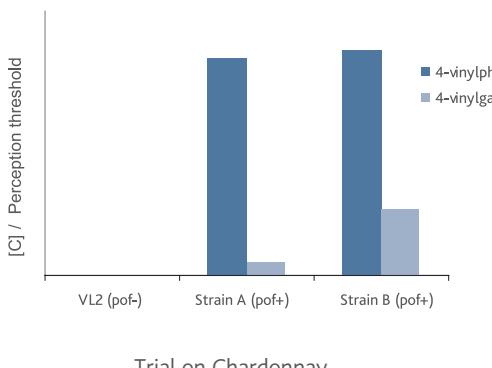

FERMENTATION CHARACTERISTICS:

- Alcohol tolerance: up to 15,5 % vol.
- Wide fermentation temperature range: 14 - 20°C
- Low nitrogen requirements
- Low production of volatile acidity and H₂S

AROMATIC CHARACTERISTICS:

- Pof(-) strain: does not contain cinnamate decarboxylase, which is responsible for the formation of aroma masking vinyl-phenols, when unpurified enzymes are used.
- Significant polysaccharide production, guaranteeing suppleness and volume on the palate.
- Very suitable for ageing on lees.

EXPERIMENTAL RESULTS

LAFFORT
l'œnologie par nature

PHYSICAL CHARACTERISTICS

Dehydrated yeast (vacuum-packed).

Aspect granular

STANDARD ANALYSIS

Humidity (%)	< 8 %
Living cells SADY CFU/g	> 2.10 ¹⁰
Lactic acid bacteria CFU/g	< 10 ⁵
Acetic acid bacteria CFU/g	< 10 ⁴
Wild yeast CFU/g	< 10 ⁵
Coliforms CFU/g	< 10 ²
E. coli CFU/g	None

Staphylococcus CFU/g.....	None
Salmonella CFU/25 g	None
Moulds /g	< 10 ³
Lead	< 2 ppm
Arsenic	< 3 ppm
Mercury	< 1 ppm
Cadmium.....	< 1 ppm

PROTOCOL FOR USE

ŒENOLOGICAL CONDITIONS

- Please refer to the Technical Booklet "Good alcoholic fermentation management" for complete information on yeast addition timing and techniques, the key points of fermentation.

DOSAGE

- 20 - 30 g/hL (200 - 300 ppm).

IMPLEMENTATION

- Carefully follow the yeast rehydration protocol indicated on the packet.
- Avoid temperature differences exceeding 10°C between the must and the yeast during inoculation. Total yeast preparation time must not exceed 45 minutes.
- In the case of potentially high alcohol concentrations and to minimise volatile acidity formation, use DYNASTART® / SUPERSTART® BLANC in rehydration water.

STORAGE

- Store in original sealed packages, in a cool dry place (off the floor) in an odour-free environment.
- Optimal date of use: 4 years.

PACKAGING

500 g vacuum bag. 10 kg box.

CS 61 611 – 33072 BORDEAUX CEDEX – Tél.: +33 (0)5 56 86 53 04 – www.laffort.com
