

Berry and fruit crusher

Berry and fruit crusher is designed for crushing products before further processing. Products can be supplied to the crusher by bin tipper, conveyor or by manually pouring the products from a box.

For better transporting, a mono-screw or other pump with a hopper can be placed underneath the outlet to transfer the mash for further processing.

Mill has interchangeable sieves for different fruits/berries/vegetables. The berry crusher can also crush stone fruits due to the special mill construction which does not damage stones or seeds.

- Powerful 5.5 kW crusher engine.
- Small and compact size.
- Mounted on pivoting wheels.
- Machine has a bottom outlet for the crushed mash.

Output	kg/h	3000
