

Fruit and vegetable washer AQUA 3000

Fruit and vegetable washer AQUA 3000 is designed for washing and cleaning fruits and vegetables before processing. AQUA has a specially produced set of brushes which do not damage the fruit. Machine works effectively with apples, pears, carrots, citrus fruits, mangoes, peaches, apricots, pomegranates and similar fruits and vegetables.

Output – 3000 kg/h

- The washer is entirely made of stainless steel.
- The speed of machine can be adjustable. It significantly helps with softer fruits which need more gentle washing.
- There is a gradual exchange of water during the washing: the inflow of fresh water comes in at the exit of the washer, the outflow of the wastewater goes out through a small tube at the entrance the washer.
- Long slide at the outlet of the machine provides a better draining process of fruits and removal of dirt (e.g. leaves, branches, etc.).
- The cover of the washer can be opened for inspection and cleaning.
- Machine is easy to clean after use because of a special inlet/outlet for washing.
- The washer has pivoting wheels.
